PEOPLE ARE PRAISING DISENO

What make they love us?

It is a very good experience with Diseno. Before this course, I knew nothing about Graphic Design but now I can make different illustrations.

I enjoyed making assignments. Honestly, I was a bit scared that how this course will go? And what're they going to teach us? But when the classes started, I was so impressed that how easily I got to know all the tools. Huge thanks to sir Mir Abbas. He is a good mentor. He was being very patient throughout the entire course & being very helpful. Thank you so much Diseno & Sir Mir Abbas.

ASMA TANVEER

@asma_sheikh01

When I enrolled for the course it was just for the sake of learning an additional skill to enhance my skill set. My initial assumption was that it's going to be a basic-level course for beginners. However halfway down the road, I realized what exactly I signed up for. The course is pro level and it helped me learn a lot about illustrator and photoshop. At this point in time, I'm confident enough to implement my learnings professionally. So glad I opted for this course and grateful to the designers of this comprehensive course.
